Make a Firework Painting

Materials: dark paper, paint, thin cardboard tube (such as from a toilet paper or paper towel roll), scissors

Optional Materials: Glitter, sequins, cotton swabs

You will also need something to paint on top of, such as newspaper, and something to put your paint in, such as small paper plates.

2. Spread out the cuts you made in your cardboard tube, and then dip the tube into your paint. Press it down onto your paper. Make several fireworks! Repeat with your other colors.

3. After you have done different colors, you could add glitter/sequins if you want. You might also want to add stars in the background using cotton swabs. Cotton swabs can also be used to add thin lines to your fireworks for a “starburst” look. Have fun!
